DFT™
Dynamic Flow Technology

M2M™
Metal to Metal Technology

It's the smallest details that give you the best results...

Now With Dynamic Flow Technology™ (DFT)

DFT harnesses the ambient air around the aircap to provide a more even and uniform paint distribution. This makes it ideal for difficult base colours such as metallics, silver, and pearls. It also minimises common paint defects like shadowing, mottling, and striping, allowing the Sagola 4600 to provide a flawless finish even at lower working pressures.

The Ultimate Gun for all Waterborne and Solvent Basecoats

Available in: 1.2, 1.2XL, 1.3 (D15414166 / D15414167 / D15414168)

- Easy matching in a 'EPA compliant' gun.

Specifically designed for new technology clearcoats.

Available in: 1.2, 1.2XL, 1.3, 1.3XL & Digital 1.3 (D15414170 / D15414171 / D15414172 / D15414173 / D15414174)

- Perfect for VOC/express drying clears.
- Premium mirror finishes and maximum control.

Designed for HS/UHS clearcoats, single coats and quality OEM finishes

Available in: 1.3 (D15414169)

- Ultrafine atomisation.
- Minimal overspray.

Ideal for applications with high air volume and low pressure.

Available in: 1.2 (D15414175)

- Offering the fastest HVLP system on the market.
- Maximum overspray reduction.
