

## **Standoblue – Technology for your success.**

**The basecoat system for exceptional quality and remarkable efficiency.**

An Axalta Coating Systems Brand

**The Art of Refinishing.**

**1 VISIT APPLICATION**

**Application in a single spray process.**

Uncompromising efficiency and economy.

**Paint technology for a better performance.**

Greater throughput in the bodyshop helps to promote economic success. The highly-pigmented Standoblu basecoat offers high coverage and can be applied in 1.5 spray passes without intermediate flash-off times.

Two viscosity adjusters offer refinishers flexibility regardless of work environment and climatic conditions.

- Save time with fast application
- Increase throughput with the same amount of time spent
- Flexible and efficient

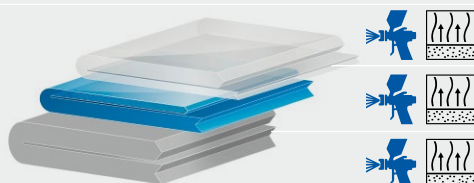

**A comparison of application processes.**

## **Standoblue. Reliable paint for every user.**

**Save time – increase efficiency.**

### **Good results are based on ease of use.**

With its advanced rheology and chemistry technology Standoblue provides easy mottling control and excellent coverage. Good blending properties help to produce a seamless repair. Once dry, Standoblue is tack-free and hard. Small imperfections can be sanded and are easy to remove. By adding a hardener, it is also possible to produce interior or engine compartment finishes quickly, or even complex three-coat or multi-colour finishes.

- Simple and straightforward application
- Seamless repairs
- Easy correction of errors

### **Future-proof thanks to on-going development.**

The range of colours, effects and variants used by OEMs is becoming more extensive. Standoblue undergoes continuous development so that bodyshops are able to repair these colours as soon as possible after the trends develop.

Standoblue has been approved by all leading automotive manufacturers and meets the quality requirements set out in OEM specifications. It is, of course, also VOC compliant.

- Outstanding colour reliability based on cutting-edge innovation
- OEM approvals by all leading automotive manufacturers
- “Made in Germany” product quality

# Standoblue.

## The components of your success.

### Tailored to every job.

The Standoblue paint system meets the needs of modern bodyshops. A carefully selected and well-documented mixing tint range offers excellent colour accuracy. Standoblue Viscosity Adjusters, Color Blend and Hardener make individual work preferences simpler and offer flexibility. Basecoat application can be carried out in a single spray process without intermediate flash-off times. Different packaging sizes help to keep costs down, as they are convenient for both small and large jobs.

#### Standoblue Basecoat.

- Excellent colour accuracy thanks to specially selected effect flakes and pigments
- Tens of thousands of mixable colours and variants including pearls, metallics and xyrillics
- Flexible in application
- Fast application in a single spray process

#### Standoblue Hardener.

- For outstanding tri-coat, multi-colour and interior finishes
- Ensures a thoroughly hard paint film
- 5% for tri-coat base colours and multi-colour finishes
- 10% for engine compartment and interior finishes

#### **Standoblue Color Blend.**

- For seamless blending-in
- One to two thin, closed spray passes are all that is needed for a smooth, even finish

#### **Standoblue Color Blend Slow.**

- Transparent and ready to spray
- Suitable for warm and dry environments
- Can be used for larger areas

#### **Standoblue Viscosity Adjuster.**

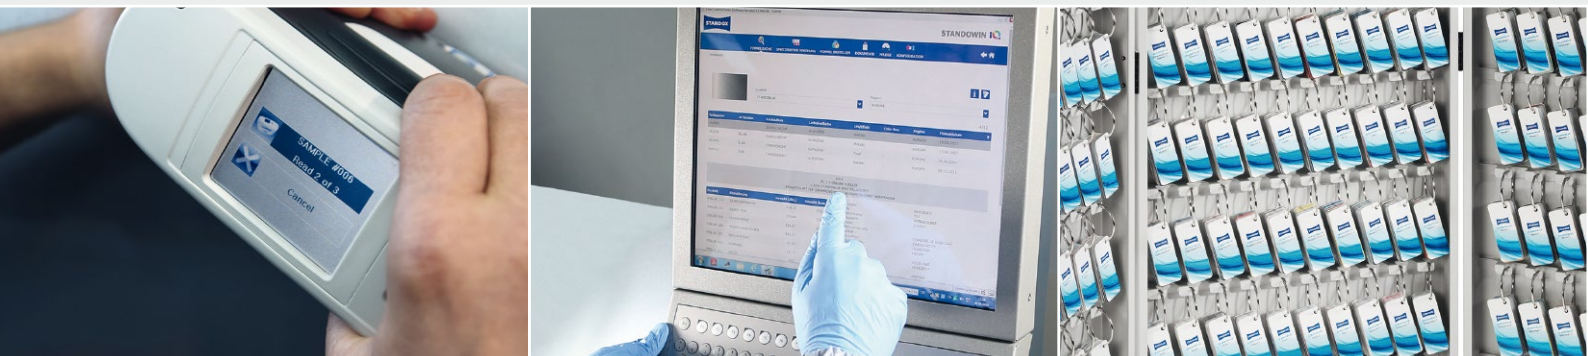

- For smaller and medium-sized repairs
- Dependent on climatic conditions
- To be added just before application
- 10% for solid / 20% for effect colours

#### **Standoblue Viscosity Adjuster Slow.**

- For medium-sized and larger repairs
- Dependent on climatic conditions, can also be used in warm and / or dry environments
- To be added just before application
- 10% for solid / 20% for effect colours

# Colour reliability with Standox colour management.

Precise colour matching and brilliant colour reproduction: these are the key criteria for accurate refinishing. Standox supports refinishers with sophisticated colour management. From colour searches to finding formulas, mixing colours and practical training courses, Standox offers the tools to achieve optimal results.

## Identifying colours and effects: Genius iQ spectrophotometer.

- Identify all relevant colour information directly on the vehicle
- Reliably identify shades and variants and also precisely determine effects
- State-of-the-art measurement from three different angles
- Simple to use with touchscreen and stylus

## Always up to date with automatic formula updates:

### Standown iQ formula updates.

- All Standox mixing formulas including tips for corrections and colour variants
- Increased data security thanks to backups of individual bodyshop formulas in the Cloud
- Access from smartphones, tablets and PCs
- Connectivity to web-enabled ancillary equipment and spectrophotometers, as well as mixing and dosing systems

## Visually identify colours: Standoblue Color Box colour swatches.

- All European and Asian colour variants grouped by car brand
- Solid colour variants since 1998, effect colours since 2003
- Convenient 35 x 90 mm swatches painted in original Standox materials
- Colour codes on the back can be read by a barcode reader for easy colour identification in Standown iQ

**Identify subtle colour differences:  
Standolux iQ daylight lamp.**

- Detect and avoid metamerism effects
- Easy and comfortable to handle
- Always ready for use thanks to a long battery life

**Support for everyday work:  
Easy-to-understand information.**

- Posters with mixing tint or shading tips information
- Blend-in technique process poster for two- and three-coat application
- Application videos and climate guide

**Personal technical contact:  
Standox application technique.**

- Telephone hotline and, if required, on site assistance
- Practical seminars and training courses
